At about 1:15pm on Friday, October 25 Tri-State Generation and Transmission had a line fault 35 miles East of La Junta causing the 115KV line that feeds Lamar South Substation to trip off-line. Tri-State had to do switching to restore power back from Willow Creek Substation to feed Lamar South. All Lamar Light & Power Customers should now have power restored.

For additional information, contact Lamar Light & Power at 719.336.7456
