January 1, 2023 through December 31, 2023	1.69
January 1, 2024 through December 31, 2024	4.93

Should the customer fail to maintain an adequate payment record pursuant to (3) below, after having received a refund, the Board reserves the right in its sole discretion to judge the customer's credit inadequate and require a deposit.

(3) Applicant's credit record shall be determined as satisfactory as follows: An applicant who previously was a customer of the Board shall be considered as having a satisfactory credit record where: The previous service was provided for a continuous period of at least nine months within the last three years, and no Notices of Discontinuance were mailed to the applicant during the last twelve months of said service.

(4) In lieu of the deposits requires under (2) above, responsibility for payment of service may be placed in the name of an existing customer of the Board who has established a satisfactory credit rating with the Board in accordance with (3) above and who is willing to provide written guarantee of payment of service to be rendered to the applicant. Such guarantee by an existing customer shall make the guarantor's service liable for discontinuance in the event the subject bills are not satisfactorily paid.

Any customer deposit as required hereunder is not to be considered as advance payment or part payment of any bill for service, but is security for service to be applied against unpaid bills only in the event service is discontinued.

NET METERING CUSTOMER GENERATION LESS THAN 25 KW <small>(General Service Classification)</small>	
CSP-1 <small>(Rate, Title, or Number)</small>	
<p><u>APPLICABILITY:</u> Applicable under the terms of a standard contract within all territory served by the Utilities Board of the City of Lamar ("Board"), subject to the Board's Rules and Regulations for Electric Service, the special conditions stated herein, and the conditions set forth in the State of Colorado House Bill 08-1160. Applicable to any Residential or Commercial customer that owns and operates a solar, wind, hydroelectric or biomass generating facility with a capacity of not more than twenty-five (25) kilowatts that is interconnected and operates in parallel with the Board's existing distribution facilities, and is intended primarily to offset part or all of the Customer's own electrical requirements measured by the Board at a Customer's metered point of delivery. Only one Customer's electrical load served by a single metering point shall be included in the calculation of net metering against any generation produced by the Customer to the conditions of this tariff.</p> <p><u>AVAILABILITY:</u> This service shall be available to a customer who agrees to comply with the requirements of this tariff and Board Rules and Regulations.</p> <p><u>DEFINITIONS:</u> Net Metering is quantifying the difference between the electricity supplied by the Board and the electricity generated by an eligible generating facility and fed back to the Board's system during the applicable billing period.</p> <p>Net Charge shall be defined as the difference between customer generated energy and Board supplied energy under circumstances where the customer generation equipment has not supplied all energy needs (kWh) consumed by the customer generator at the service location.</p> <p>Net Credit shall be defined as the difference between customer generated energy and Board supplied energy under circumstances where the customer generation equipment supplies more than the energy needs (kWh) consumed by the customer generator.</p> <p><u>BILLING OR PAYMENT:</u> Net credits will be carried over from month to month for a period of twelve months beginning January 1 and ending on December 31, the "Net Metering Period". A reconciliation of the account will be performed on January 31. If a credit balance remains at the end of the Net Metering Period, within sixty (60) days of the end of the Net Metering Period a payment will be made or, at the option of the customer, the credit will be carried forward to the next Net Metering Period. Bills shall be calculated and rendered on a monthly billing cycle basis.</p>	Rate

ELECTRIC COST ADJUSTMENT (General Service Classification)																			
E C A (Rate, Title, or Number)																			
<p>Applicability: Applicable in all territory served and subject to the terms and conditions set forth in the Rules and Regulations for Electric Service of the Utilities Board of the City of Lamar.</p> <p>The Board may invoke the ECA when unexpected increases in the cost of power or other emergencies are greater than or projected to be greater than a ten percent (10%) deviation in Fiscal Year (FY) budgeted purchased power cost. The determination of whether the ECA meets the criteria for invoking the ECA shall be based on the current expenses Year to Date and on the FY projected expenses. If it is determined that the total projected expenses will deviate from the current purchased power budget by ten percent (10%) or more, the Board may proceed with applying the ECA on a monthly basis for a period of not more than 12 months.</p> <p>At the end of any ECA application period, any under collected or over collected revenues will be totaled and used to determine if the ECA should continue to be applied for an additional period of time of not more than 12 months.</p> <p>The ECA shall apply and be part of:</p> <table style="margin-left: 40px; border: none;"> <tr><td>Residential</td><td>Sheet No. 3</td></tr> <tr><td>General Service Small</td><td>Sheet No. 5</td></tr> <tr><td>General Service Large</td><td>Sheet No. 7</td></tr> <tr><td>Energy for Resale, Contract</td><td>Sheet No. 8</td></tr> <tr><td>Contractual Sales</td><td>Sheet No. 10</td></tr> <tr><td>Irrigation</td><td>Sheet No. 11</td></tr> <tr><td>Street Lighting</td><td>Sheet No. 13</td></tr> <tr><td>Area or Yard Floodlighting</td><td>Sheet No. 14</td></tr> <tr><td>Municipal Use</td><td>Sheet No. 15</td></tr> </table> <p>Formula for Calculation the ECA Factor The following formula is used to determine the Energy Cost Adjustment when it is invoked. The ECA will be calculated to the nearest one-tenth of a mill (\$0.0001) per KWh.</p> <p>When unexpected increases in the cost of power or other emergencies are estimated to be greater than a 10% deviation in FY budgeted purchased power costs and the Board invokes the ECA, the formula for determining the ECA shall be:</p> $\text{ECA} = \frac{(\text{Total Projected Cost} - \text{Budgeted expenses, for Application Period})}{(\text{Estimated kWh Sales for Application period})}$ <p>Where: Total projected cost = the actual expenses year to date + the projected expenses through the application period - the budgeted expenses through the application period divided by the projected kWh sales during the application period.</p> <p>Application Period is equal to the number of months (1 to 12) that the ECA will be in force.</p>	Residential	Sheet No. 3	General Service Small	Sheet No. 5	General Service Large	Sheet No. 7	Energy for Resale, Contract	Sheet No. 8	Contractual Sales	Sheet No. 10	Irrigation	Sheet No. 11	Street Lighting	Sheet No. 13	Area or Yard Floodlighting	Sheet No. 14	Municipal Use	Sheet No. 15	<p>Rate</p> <p>\$0.0000</p>
